

§ 7B-1403. Task Force – duties.

The Task Force shall:

- (1) Undertake a statistical study of the incidences and causes of child deaths in this State and establish a profile of child deaths. The study shall include (i) an analysis of all community and private and public agency involvement with the decedents and their families prior to death, and (ii) an analysis of child deaths by age, cause, and geographic distribution;
- (2) Develop a system for multidisciplinary review of child deaths. In developing such a system, the Task Force shall study the operation of existing Local Teams. The Task Force shall also consider the feasibility and desirability of local or regional review teams and, should it determine such teams to be feasible and desirable, develop guidelines for the operation of the teams. The Task Force shall also examine the laws, rules, and policies relating to confidentiality of and access to information that affect those agencies with responsibilities for children, including State and local health, mental health, social services, education, and law enforcement agencies, to determine whether those laws, rules, and policies inappropriately impede the exchange of information necessary to protect children from preventable deaths, and, if so, recommend changes to them;
- (3) Receive and consider reports from the State Team; and
- (4) Perform any other studies, evaluations, or determinations the Task Force considers necessary to carry out its mandate. (1991, c. 689, s. 233(a); 1996, 2nd Ex. Sess., c. 17, s. 3.2; 1998-202, s. 6; 1998-212, s. 12.44(a), (c).)
